STATINTL

18 August 1972

In my quest for additional information concerning the FP-45 "Liberator" pistol I have come across three names of persons who might be able to add something to my inquiries.

They are    Capt. STEWART G. CUTLER    0394597  
                 Cpl. ARRON R. STEARNS  
                 Pfc. LIONAL WINSTOCK

These persons worked for OSS in a liaison capacity between OSS and the Army Air Force 856th Squadron. As you may note from the attached copy, these persons would be able to verify if the pistols were ever air-dropped or were just handed out to the Resistance.

If possible I would appreciate their serial numbers and last known addresses. In that way I'll be able to forward the information on to the U.S. Army Personnel Center for a locator check. Any information you might be able to furnish would be greatly appreciated...as usual.
